Diego Grados

As a bioscience engineer, agroecologist and applied statistician, my work is centered on solving sustainable development challenges in agriculture. I use interdisciplinary approaches focusing on the fundamental and applied aspects of soil-plant-atmosphere interactions, agroecosystem analysis and remote sensing. With extensive involvement in international research projects alongside multidisciplinary partners, I have honed my teamwork and communication skills. I am proficient in programming languages for data-processing applications and process-based modelling. Additionally, I am enthusiastic about creating integrated assessments that use data science to translate information into knowledge.

Relevant Experience

Sep 2020 - Present
Postdoctoral Researcher - *Aarhus University*, Aarhus - Denmark
Climate and Water - Agroecology Department - Faculty of Technical Sciences
- Study of mitigation strategies for greenhouse gas emissions and adaptation practices to climate change.
- International and national collaboration projects: PROENV, MACSUR SciPol, ZERO, KlimaGødning.
- Dissemination of results in seminars, workshops, peer-reviewed journals and international conferences.
- Supervision of MSc and PhD thesis students.

Reference: Prof. Dr. Diego Abalos, Prof. Dr. Jørgen Eivind Olesen

Jul 2023 - Ago 2023
Visiting Researcher - *Massachusetts Institute of Technology (Faculty of Climate, Environment and Life Science)* and *Boston College (Faculty of Earth and Environmental Sciences)*, Massachusetts - United States of America
- Collaboration on using machine-learning techniques and the terrestrial biosphere model (DLEM) to assess nitrogen cycling and crop production from agroecosystems at global scale.

Reference: Prof. Dr. César Terrer, Prof. Dr. Hanqin Tian

Nov 2021 - Dec 2021
Visiting Researcher - *Karlsruhe Institute of Technology*, Garmisch-Partenkirchen - Germany
Institute of Meteorology and Climate Research, Atmospheric Environmental Research
- Collaboration on using the LandscapeDNDC terrestrial ecosystem model to simulate greenhouse gas emissions and crop production at site and regional scale.

Reference: Dr. Edwin Haas, Prof. Dr. Klaus Butterbach-Bahl

Jan 2020 - Mar 2020
Researcher - *KU Leuven*, Leuven - Belgium
Biostatistics and Sustainability Groups - Biosystems Department - Faculty of Bioscience Engineering

Apr 2016 - Dec 2019
PhD Researcher - *KU Leuven*, Leuven - Belgium
- Developing multi-target and system modeling methodologies for the agroecosystems' sustainability assessment.
- Dissemination of results in seminars, workshops, peer-reviewed journals and international conferences.
- Supervision of BSc and MSc thesis students in Peru (UNALM and UNCP) and Belgium (KU Leuven).

Reference: Prof. Dr. Eddie Schrevens

Nov 2014 - Apr 2019
Research Assistant - *VLIR/UOS Project*, Lima - Peru
Strengthening of Smallholder Horticultural Systems Subproject
- Co-leading the study of soil-plant-atmosphere interactions in the Peruvian Coastal Desert.
- Installation of soil, meteorological and irrigation equipment.
- Design, installation and analysis of agricultural experiments under drip irrigation systems.

Reference: Prof. Dr. Eddie Schrevens, Prof. Dr. Guido Wyseure, Prof. Dr. Jan Diels

Sep 2013 - Dec 2018
Research Officer - *VLIR/UOS Project*, Junin - Peru
Sustainable Agriculture in the Central Peruvian Andes Subproject
- Lead the design, installation and evaluation of agricultural experiments under rainfed conditions.
- Consolidation of rational databases, development of soil-plant-atmosphere models and statistical techniques.
- Analysis of agroecosystems using participatory approaches along with biophysical and biochemical assessments.

Reference: Prof. Dr. Eddie Schrevens, Prof. Dr. Sady García

Feb 2013 - Apr 2019
Research Officer - *VLIR/UOS Project*, Junin | Lima - Peru
Drone Technology in Agriculture Subproject
- Lead the feasibility study for uses of drone technology in agroecosystems.
- In charge of drone flights in Peruvian's Andes and Arid regions. Implementation of photogrammetric and GIS databases.
- Development of mathematical and statistical workflows for land use classification and field experiments' assessment.

Reference: Prof. Dr. Eddie Schrevens, Sr. R&D Dries Raymaekers

Jan 2012 - Dec 2018
Research Officer - *VLIR/UOS Project*, Junin - Peru
Watersheds Management Subproject
- Lead the study of soil-plant-atmosphere interactions and hydrology in the Peruvian Central Andes.
- Installation of soil, climatological and hydrometric equipment.
- Implementation of databases, application of hydrological models and assessment of rainfall-runoff relations.

Reference: Prof. Dr. Eduardo Chávarri, Prof. Dr. Guido Wyseure

Education

Apr 2016 - Dec 2019
PhD in Bioscience Engineering, *Biostatistics and Sustainability* - KU Leuven, Belgium
Thesis Title: "Multi-target methodologies for the improvement of agricultural systems research - *Study cases at system and field level*". | Advisor: Prof. Dr. Eddie Schrevens

Jan 2007 - Dec 2011
BSc in Agricultural Engineering, *Hydrology* - Agrarian National University La Molina , Peru
Honor Thesis Title: "Analysis of flood peaks in small Andean watersheds, Junin Department, Peru (2011-2012 Period)". | Advisor: Prof. Dr. Eduardo Chávarri

Teaching Experience

FA 2021 - 2023 Carbon Cycling and Climate Change - Master in Agrobiology, **Aarhus University**
Teacher Assistant: I lectured on soil nitrogen cycling and nitrous oxide emissions. I guided students during the discussion and practical sessions to assess agroecosystems. I supported them on the development of their research papers. [20 students]

FA 2017 - 2019 Applied Multivariate Statistical Analysis - Master in Bioscience Engineering, **KU Leuven**
Teacher Assistant: I taught students how to analyze their databases using statistical software by leading R-tutorials. I was responsible for the practical sessions on data wrangling and visualization, matrix algebra, R-programming and advanced multivariate techniques. [80 students]

FA 2019 Biological Production Systems - Bachelor in Bioscience Engineering, **KU Leuven**
Teacher Assistant: I guided students during discussions and practical sessions to assess agroecosystems. I taught them the essentials of process-based mathematical modelling and supported them on the development of their research papers. [25 students]

SP 2016 Ecosystems Modelling - Master in Bioscience Engineering, **KU Leuven**
Teacher Assistant: I taught students how to develop and utilize ecosystems models at diverse scales by leading R-tutorials. I guided the practical sessions on mathematical and statistical concepts, data wrangling and visualization, R-programming. I taught them the fundamental topics on process-based modelling of ecosystems: identification, implementation, calibration and validation. [10 students]

Fellowships and Grants

2023 **Land-CRAFT** Research Grant [6 000€]
2022 **Aarhus University** Travel Grant [400€]
2021 **iClimate** Research Grant [3 600€]
2020 **FONDECYT-CONCYTEC** Research Grant [5 500€]
2016 - 2019 **VLIR/UOS** PhD Fellowship [82 000€]
2013 | 2014 | 2015 **VLIR/UOS** International Scholar Fellowships [67 000€]

Ad-Hoc Reviewer

Agronomy for Sustainable Development, *Agricultural Systems*, *European Journal of Agronomy*, *European Journal of Soil Science*, *Geoderma*, *Journal of Cleaner Production*, *Plant and Soil*, *Soil Use and Management*, *Theoretical and Applied Climatology*.
