

Diego Grados

I am a bioscience engineer and applied statistician using interdisciplinary approaches to address sustainable development challenges in agriculture. I am focused on fundamental and practical aspects of soil-plant-atmosphere interactions, agroecosystems analysis, and remote sensing. During my involvement in international research projects with multidisciplinary partners, I have demonstrated excellent teamwork and communication skills. I am proficient in programming languages for data-processing applications and process-based modelling. I have also cultivated my enthusiasm for the creation of integrated assessments, focusing on the data science to translate information into knowledge.

Relevant Experience

SEP 2020 - PRESENT	Postdoctoral Researcher - AARHUS UNIVERSITY , Aarhus - Denmark <i>Climate and Water - Agroecology Department - Faculty of Technical Sciences</i> <ul style="list-style-type: none">- Mitigation strategies of greenhouse gas emissions (field experiments, data-driven applications, process-based models).- International collaboration projects: PROENV, MACSUR SciPol.- Dissemination of results in seminars, workshops, peer-reviewed journals and international conferences.- Mentoring and supervision of MSc and PhD thesis students. References: Prof. Dr. Diego ABALOS, Prof. Dr. Jørgen Eivind OLESEN
JAN 2020 - MAR 2020	Researcher - KU LEUVEN , Leuven - Belgium <i>Mechatronics, Biostatistics and Sensors - Biosystems Department - Faculty of Bioscience Engineering</i> <ul style="list-style-type: none">- Developing of multi-target and system modeling methodologies for the agroecosystems' sustainability assessment.- Dissemination of research results in workshops and peer-reviewed journals. Mentoring of PhD thesis students.
APR 2016 - DEC 2019	PhD Researcher <ul style="list-style-type: none">- Developing of multi-target and system modeling methodologies for the agroecosystems' sustainability assessment.- Dissemination of results in seminars, workshops, peer-reviewed journals and international conferences.- Mentoring and supervision of BSc and MSc thesis students in Peru (UNALM and UNCP) and Belgium (KU Leuven). Reference: Prof. Dr. Eddie SCHREVENs
NOV 2014 - APR 2019	Research Assistant - VLIR/UOS-UNALM PROJECT , Lima - Peru <i>Strengthening of Smallholder Horticultural Systems Subproject</i> <ul style="list-style-type: none">- Co-leading the study of soil-crop-environment interactions in the Peruvian Coastal Desert.- Installation of soil, meteorological and irrigation equipment.- Design, installation and analysis of agricultural experiments under drip irrigation systems. References: Prof. Dr. Eddie SCHREVENs, Prof. Dr. Guido WYSEURE, Prof. Dr. Jan DIELS
SEP 2013 - DEC 2018	Research Officer - VLIR/UOS-UNALM PROJECT , Junin - Peru <i>Sustainable Agriculture in the Central Peruvian Andes Subproject</i> <ul style="list-style-type: none">- Leading the design, installation and evaluation of agricultural experiments under rainfed conditions.- Consolidation of rational databases, development of soil-crop-atmosphere models and advanced statistical techniques.- Analysis of agroecosystems using participatory approaches along with biophysical and biochemical assessments. References: Prof. Dr. Eddie SCHREVENs, Prof. Dr. Sady GARCÍA
FEB 2013 - APR 2019	Research Officer - VLIR/UOS-UNALM PROJECT , Junin Lima - Peru <i>Drone Technology in Agriculture Subproject</i> <ul style="list-style-type: none">- Leading the feasibility study for uses of drone technology in agroecosystems.- In charge of drone flights in Peruvian's Andes and Arid regions. Implementation of photogrammetric and GIS databases.- Development of mathematical and statistical workflows for land use classification and field experiments' assessment. References: Prof. Dr. Eddie SCHREVENs, MSc. Dries RAYMAEKERS
JAN 2012 - DEC 2018	Research Officer - VLIR/UOS-UNALM PROJECT , Junin - Peru <i>Watersheds Management Subproject</i> <ul style="list-style-type: none">- Leading the study of soil-crop-environment interactions and hydrology in the Peruvian Central Andes.- Installation of soil, climatological and hydrometric equipment.- Implementation of databases, application of hydrological models and assessment of rainfall-runoff relations. References: Prof. Dr. Eduardo CHÁVARRI, Prof. Dr. Guido WYSEURE

Education

APR 2016 - DEC 2019	PhD in Bioscience Engineering, Mechatronics, Biostatistics and Sensors - KU Leuven , Belgium Thesis Title: "Multi-target methodologies for the improvement of agricultural systems research - Study cases at system and field level". Advisor: Prof. Dr. Eddie SCHREVENs
JAN 2007 - DEC 2011	BSc in Agricultural Engineering, Hydrology - Agrarian National University La Molina , Peru Honor Thesis Title: "Analysis of flood peaks in small Andean watersheds, Junin Department, Peru (2011-2012 Period)". Advisor: Prof. Dr. Eduardo CHÁVARRI

Teaching Experience

FA 2021 - 2023	Carbon Cycling and Climate Change - Master in Agrobiology, Aarhus University Teacher Assistant: I gave a lecture on soil nitrogen cycling and nitrous oxide emissions. I guided students during the discussion and practical sessions to assess agroecosystems. I supported them on the development of their research papers. [20 students]
FA 2017 - 2019	Applied Multivariate Statistical Analysis - Master in Bioscience Engineering, KU Leuven Teacher Assistant: I taught students how to analyze their databases using statistical software by leading R-tutorials. I was responsible for the practical sessions on data wrangling and visualization, matrix algebra, R-programming and advanced multivariate techniques. [80 students]
FA 2019	Biological Production Systems - Bachelor in Bioscience Engineering, KU Leuven Teacher Assistant: I guided students during the discussion and practical sessions to assess agroecosystems. I taught them the essentials of process-based mathematical modelling and supported them on the development of their research papers. [25 students]
SP 2016	Ecosystems Modelling - Master in Bioscience Engineering, KU Leuven Teacher Assistant: I taught students how to develop and utilize ecosystems models at diverse scales by leading R-tutorials. I guided the practical sessions on mathematical and statistical concepts, data wrangling and visualization, R-programming. I taught them the fundamental topics on process-based modelling of ecosystems: identification, implementation, calibration and validation. [10 students]

Fellowships

2022	Aarhus University Travel Grant [400€]
2021	iCLIMATE Research Grant [3 600€]
2020	FONDECYT-CONCYTEC Research Grant [5 500€]
2016 - 2019	VLIR/UOS-UNALM PhD Fellowship [82 000€]
2013 2014 2015	VLIR/UOS-UNALM International Scholar Fellowships [67 000€]

Ad-Hoc Reviewer

Agronomy for Sustainable Development, Agricultural Systems, European Journal of Agronomy, Geoderma, Journal of Cleaner Production, Plant and Soil, Soil Use and Management.

Languages

English: Full professional proficiency	Italian and Dutch: Elementary working proficiency
French: Limited working proficiency	Spanish: Native/Bilingual
